Спецификация
контрольно-измерительных материалов для проведения
промежуточной аттестации по английскому языку в 7 классе

Назначение КИМ – получение объективной информации о состоянии уровня освоения обучающимися 7х классов Федерального государственного образовательного стандарта основного общего образования по английскому языку для проведения методической и коррекционной работы с целью повышения результативности освоения ФГОС основного общего образования по английскому языку.

Документы, определяющие содержание КИМ:

1. Федеральный государственный образовательный стандарт основного общего образования (утвержден приказом Министерства просвещения Российской Федерации от 31.05.2021г. №64101 с изменениями и дополнениями).
2. Рабочая программа «Английский язык 5-9 классы» ГБОУ гимназии г.Сызрани (разработанная на основе федеральной образовательной программы основного общего образования, со спецификацией углубленного изучения)

Структура и содержание КИМ

В КИМ включены 2 устных задания, требующих самостоятельного ответа.

Первое задание — это чтение текста (используются научно-популярные, информационные, публицистические и художественные тексты, на основе заданий ОГЭ).

Второе задание- участие в условном диалоге-расспросе, состоящем из 6 вопросов, на основе заданий ОГЭ.

Критерии оценивания выполнения задания 1 (Чтение текста вслух) – максимум 2 балла

Фонетическая сторона речи	
2	Речь воспринимается легко: необоснованные паузы отсутствуют; фразовое ударение и интонационные контуры, произношение слов практически без нарушений нормы; допускается не более 5 (пяти) фонетических ошибок, в том числе одна-две ошибки, искажающие смысл
1	Речь воспринимается достаточно легко, однако присутствуют необоснованные паузы; фразовое ударение и интонационные контуры практически без нарушений нормы; допускается не более 7 (семи) фонетических ошибок, в том числе три ошибки, искажающие смысл
0	Речь воспринимается с трудом из-за значительного количества неестественных пауз, запинок, неверной расстановки ударений и ошибок в произношении слов, ИЛИ допущено более семи фонетических ошибок, ИЛИ сделано четыре и более фонетические ошибки, искажающие смысл

Критерии оценивания выполнения задания 2 (Условный диалог-расспрос) – максимум 6 баллов

Баллы		
Ответ на вопросы 1–6	1 балл. Дан полный ответ на поставленный вопрос; допущенные отдельные фонетические, лексические и грамматические погрешности не затрудняют понимания.	0 баллов. Ответ на вопрос не дан, ИЛИ ответ не соответствует заданному вопросу, ИЛИ ответ дан в виде слова или словосочетания, И/ИЛИ допущены фонетические и лексические и грамматические

		ошибки, препятствующие пониманию ответа.
--	--	--

Продолжительность выполнения работы составляет 10 минут.

Оценивание выполнения заданий

За верное выполнение первого задания ученик получает от 0 до 2 баллов, за второе задание учащийся получает 1 балл за каждый верный ответ на вопрос. За неверный ответ или его отсутствие выставляется 0 баллов.

Максимальное количество баллов, которое может набрать учащийся, составляет **8 баллов**

По результатам выполнения учащимся заданий КИМ осуществляется **перевод количества баллов в оценки:**

8 баллов соответствуют оценке «5» (отлично);

7-6 баллов соответствуют оценке «4» (хорошо);

5-4 баллов соответствуют оценке «3» (удовлетворительно);

3 балла и ниже соответствуют оценке «2» (неудовлетворительно).

**Демонстрационный вариант
контрольно-измерительных материалов для проведения
промежуточной аттестации по английскому языку в 7 классе**

Билет 1

Ex.1 You are going to read the text aloud. You have 2 minutes to read this text silently, and then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

The ninth planet of the solar system was discovered not long ago. It happened in 1930. Scientists had been hunting for the planet for a long time. They had calculated its probable position but there was no proof that the planet really existed. It was too far away for the telescopes of that time to find it. It's worth mentioning that the first photos of the planet were taken by a very young researcher. He was only twenty-four and had no formal education in astronomy. However, he was deeply involved in the search for the ninth planet. The planet at the edge of the solar system was called Pluto, after the Roman god. The name for the planet was suggested by an 11-year-old British girl.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Why do people worry about environmental problems so much nowadays?
3. What are the most important environmental problems in your area?
4. How can you and your friends take care of the environment?
5. Should people use the energy of the Sun more?
6. How can we save energy in our everyday life?

Билет 2

Ex.1 You are going to read the text aloud. You have 2 minutes to read this text silently, and then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

One day a young man who lived near the lake in a small American town asked himself, “Why can’t people ski on water if they can ski on snow?” With his brother’s help he constructed several models of skis to test his ideas. He experimented on the local lake for a few days and created skis suitable for the water. This happened in 1922. The young man, who was only 18 at that time, didn’t patent his invention. However, he performed a lot of shows across the country that made him and the sport of water skiing popular. Later, he was recognized as the creator of a new sport – water skiing. Water skiing equipment has been greatly improved since that time, and the number of people who enjoy this sport is growing in many countries.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. How can internet technologies be used in education?
3. What purposes do you use the Internet for?
4. Can the Internet do harm to teenagers?
5. What do you usually do in your Information Technology lesson?
6. Why is writing e-mails much more popular with people than writing traditional letters?

Билет 3

Ex.1 You are going to read the text aloud. You have 2 minutes to read this text silently, and then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

The telescope is the oldest and probably the most effective tool to explore space. It has been used by astronomers since the 16th century and it has tremendously changed our knowledge of the universe. Certainly, the telescope itself has changed a lot since that time too. The most famous telescope nowadays, the Hubble Telescope, works in space, in low Earth orbit. It works from above the atmosphere of the Earth and that is why it produces fantastically clear photos. The Hubble was launched into space on 24th April, 1990 from the Space Shuttle Discovery and is still in operation. Scientists say its information could help them to solve the mystery of the black holes and to understand how they form.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Are you going to continue your education at school or anywhere else?
3. What subject would you like to specialise in?
4. Can distance learning help you in your future education?
5. Do you plan to attend any clubs, sections or extra classes?
6. What qualities do you need for your future studies?

Билет 4

Ex.1 You are going to read the text aloud. You have 2 minutes to read this text silently, and then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

Most tourists who come to London want to see the Globe Theatre. It is one of the main landmarks in the British capital. The theatre has always been linked with William Shakespeare. His plays have been staged there for several centuries. Historians say that the theatre was built in 1599. It was a large, round, open air theatre. In those days special coloured flags were used to advertise the type of play to be performed. A red flag was put up for a history play, a white flag for a comedy, and a black flag for a tragedy. The theatre worked for 14 years before it was destroyed by fire. Then it was rebuilt, destroyed, and reconstructed again. The theatre has changed several names and now it is called Shakespeare's Globe.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Do both teenage boys and girls pay attention to fashion?
3. What fashion style do you prefer?
4. Is it right to judge a person on what he/she wears?
5. Do you think fashion style should be different for adults and teenagers?
6. Should school uniform be fashionable?

If you look at the night sky, you will see an endless number of stars. When there are no clouds, you can also see a band of light that goes across the sky. It is called the Milky Way. In 1610, after the invention of the telescope, scientists found out that the Milky Way consists of individual stars. Our Solar System is a tiny part of the Milky Way and it is located close to its centre. The Milky Way contains over 200 billion stars and enough dust and gas to make billions more. More than half of the stars are older than our Sun. Until the last century, scientists believed that all the stars of the Universe were inside the Milky Way. Now, it is well-known that there are a lot of other galaxies like ours.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. What place impressed you most?
3. Why did it impress you?
4. Would you like to live in this place?
5. What can you do there?
6. Would you advise your friends to visit it?

Ex.1 You are going to read the text aloud. You have 2 minutes to read this text silently, and then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

Lots of people keep pets and it looks like the number of pet owners is growing. In 2018, dogs were the leading type of pet. The number of pet dogs worldwide was about 471 million. The second most popular pet is, of course, the cat — the population of cats is only a little lower. Pet owners usually treat their animals like members of the family and give them lots of time and attention. The animals reflect that behaviour — they make the most devoted friends to people. When there are several pets in the household, they usually get along well. Even animals that are enemies in the natural environment live peacefully in people's houses. There are lots of photos and videos on social networks proving that cats and dogs enjoy each other's company and often play together.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Does your family subscribe to any newspapers or magazines?
3. Do you have any favourite newspaper or magazine?
4. Is it popular to read online magazines or buy them?
5. Is reading newspapers still popular among teens nowadays?
6. How do you prefer to get information?

Билет 7

Wombats are exotic animals that only live in Australia. They have become an unofficial symbol of the country. In 1974 a wombat appeared on an Australian stamp for the first time. Since then it has been regularly used on different Australian stamps and coins. Wombats look like little bears and prefer grass to meat. They also love eating berries, plant roots and mushrooms. Like camels, wombats drink little water because there is enough water in fresh grass. Wombats spend most of their life in holes under the ground. With their strong arms and long nails they are able to dig very long and complex tunnels. Fortunately, wombats have few enemies in the animal world. Most wombats live around 15 years.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Why do you go shopping?
3. Do you prefer shopping in big supermarkets or small local shops?
4. What is your latest shopping experience?
5. What do you think about online shopping?
6. Why do big supermarkets are popular among people?

The rainforest can be described as a thick and very tall jungle. The term rain comes from the great quantity of water that these forests get throughout the year. The rainforests are the world's greatest natural resources. They are called the lungs of our planet. Half of all the kinds of plants and animals that exist on the planet live in the rainforests. Unfortunately, the area with rainforests is being reduced due to global warming. 100 years ago, the rainforests covered 14 per cent of the earth's surface. Now, it is only 6 per cent. Scientists say that if the process continues at this rate, the rainforests will have disappeared in 40 years.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Does school play the main role in your life?
3. What subjects do you study at school?
4. Is it difficult or easy for you to study school subjects?
5. Do you consider your school to be the best one?
6. What after-school activities does your school offer?

Билет 9

A robot is a machine that does work for people. The word "robot" appeared in the 1920s and it was first used in a science fiction story. In real life, the robot was invented later, in 1954. There are different kinds of robots which are used in different industries. Most of them are operated with the help of a computer program. Instead of humans, robots do hard and boring work in unpleasant or dangerous environments. They usually work faster and more accurately than people. They never get tired and do not make mistakes. Nowadays robots are often used for domestic needs – to clean houses or to look after sick and elderly people. Scientists say that soon robots will become a normal part of our life, like mobiles and computers today.

Most people enjoy watching the night sky. And the brightest object in the sky is the Moon. Every night the Moon rises in the East and sets in the West. It takes about 27 days to go around the Earth, and it's an interesting fact that we always see the same side of the Moon. The Moon is the closest object to the Earth. It would take us only 13 hours to get to the Moon by rocket. If we were able to travel at the speed of light, it would take a bit less than two seconds. There is a very thin atmosphere on the Moon. Life is not possible there. In spite of this, the Moon can be used as a base for space exploration and even for space tourism. Some space companies say that they will be able to take tourists to the Moon as soon as in 2020.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Do you like to travel?
3. What is your favourite type of transport for travelling?
4. What was your last trip?
5. What thing would you invent for better transportation in the future?
6. Is travelling a hobby for your family?

Generational gaps are a modern phenomenon caused by the rapid changes of the modern era. Technological advances have made communication with other cultures and different groups with different ideas much easier. As younger generations grow up with these advances and exposure to new ideas and cultures, they become separated from the previous generation in terms of philosophy and culture. The stereotype of conservative parents and liberal children is a result of the generation gap. In previous eras before the 1960s, communication was more limited. Younger generations grew up influenced primarily by their parents, their immediate family and their immediate neighbours. Thus, they continued the older generation's traditions and ideals. However, in the present day, the influences grow larger with every passing decade.

Belfast is the capital and largest city of Northern Ireland. It stands at the mouth of the River Lagan and has the population of 286,000. Belfast has a temperate climate but, thanks to the Gulf Stream, it is milder than other locations at a similar latitude. Belfast used to be a centre of the Irish linen, tobacco and shipbuilding industries. It is mostly famous for the Titanic that was built at the beginning of the 20th century in the biggest in the world shipyard called Harland and Wolff. Belfast was also a global industrial centre during the Industrial Revolution. Today, Belfast is the industrial, economic and business centre of Northern Ireland as well as a centre for the arts and higher education. The city's culture has always been influenced by two cultural communities — Protestants and Catholics.

Camping is a popular activity in Russia and abroad. Camping means living in a tent or other temporary shelter on open land where outdoor life can be enjoyed to the fullest. Fresh air, glimpses of wildlife, and the smell of breakfast cooked outside are just some of its advantages. Camping is an activity in which both young and old can take an active part. The father of modern camping was Thomas Hiram Holding. His passion for camping developed as a child when he crossed the United States with his parents in a wagon train. Later, he went on canoe and bicycle camping trips in Great Britain and Ireland. In 1901 he created the Association of Cycle Campers in England and later wrote the first edition of "The Camper's Handbook". Nowadays the Camping and Caravanning Club is a United Kingdom organisation which specialises in all aspects of camping

then be ready to read it aloud. You will not have more than 2 minutes for reading aloud.

Some people can ask a question: “Who invented writing?”. Here is the answer to it. The world’s earliest writing systems seem to have been used by the Sumerians, who lived in the Middle East. They had a kind of picture writing, with over 1,500 signs for different objects, numbers, and other ideas. The signs were written with a piece of wood on clay tablets, which then were baked to keep them hard. Nobody knows the exact answer to the question how the Sumerians invented this writing system. And archeologists haven’t found an earlier writing system yet. In the recent article in the journal Scientific American, a French archeologist suggests that writing may have developed from the use of stones and other objects for counting. The Romans used stones, too.

Every year the Russian government makes an announcement about the fixed date holidays for the coming year. When a public holiday in Russia falls on a Tuesday or Thursday, the preceding Monday is usually declared a ‘bridge’ public holiday that year. A Saturday nearby then is becoming a regular working day. If the holiday falls on a Saturday or Sunday, an additional day off may be publically announced. New Year holidays can also sometimes be extended until the 7th January, while the nearest Saturday and/or Sunday may be declared working days. Each city in Russia also has an official founding date with celebrations, speeches, food and drink. Moscow’s City Day, for example, is usually celebrated around the first weekend of September.

Ex. 2 You have to answer six questions. Give full answers to the questions. You have 40 seconds to answer each question.

1. How old are you?
2. Do modern teenagers have a lot of problems?
3. Why do not some teens want to study?
4. Who can help teenagers with their problems?
5. How do you solve your problems?
6. What can you advise a teenager with health problems?
